

It is impossible to imagine our life without music. It accompanies us throughout our lives. Symphonic, chamber, instrumental, classical, folk, dance, light, modern. Jazz, pop – these are only some kinds of music.

Music is a magic power feelings. Like all beautiful Music lives in the smallest itself seems to bring it forth. greet a new day, crystal drops grass, brooks babble. And all morning sonata. Music lives refined, sensitive and delicate can hardly imagine birds not a man not speaking. Take all dead and artificial. Music us.

that reflects human life and things it is eternal and immortal. parts of the universe. The nature With the first ray of the sun birds of new ring on slim stalks of this orchestra performs a even in the silence and only a soul can feel and enjoy it. One singing, flowers not smelling or this away and the earth will be brings life to everything around

The glamour of nature inspires poets, overfills their hearts with excitement and desire to pour it out of their poetry. Music and poetry can never be separated for they speak the same language, the language of the Beauty. As the words for a poet, so music for composer is the main means to carry his or her world to our hearts. Each poem demands its music. When they become one they deliver a song.

Our mood is connected with a particular music. Being elated and content, a man with a merry melody on his lips stretches his arms to the whole world. A gloomy, melancholic mood implies slow and sad melody.

Certain music reflects a certain period of our life: the first love, disappointment, losses, success. Besides music is a universal language that makes communication between different epochs, generations, countries and nations possible.

We asked the students of our university about their musical preferences and choices. Here are their preferences and opinions.

THERE ARE so many kinds of music in our life. For example, rap and pop music, rock and alternative music, industrial and disco music, drum & bass and techno music, and, of course, classic music. Different people like different music. The scientists say that they can define your character if they know what music you like. For example, they suppose that people who listen to rock music are very clever and reasonable. British scientists confirm that most young people listen to the aggressive music such as metal and rock. Scientists are sure that these people are good students, because of their character and enthusiasm. I agree with this statement, because I think that music reveals your soul and nature.

As for me, my favorite group is "Rammstein". I like this group because of good texts and unusual musical decisions. This group was formed in 1994. They released 6 Studio albums and 4 live albums. I like all their songs without distinction. My favorite song is "Reise, Reise". There are six men in this group: Till Lindemann, Richard Z. Kruspe Bernstein, Paul H. Landers, Oliver «Ollie» Riedel, Christian Flake Lorenz, Christoph «Doom» Schneider. This year they have released another song for the new album.

I always adore people who compose music and write poems. I think that such people are very talented. Also I believe that they show their feelings with the help of their music or poems. They can make you cry or laugh. You think both about global and local ones.

Nowadays we have relaxing music. More helpful than all music of such famous composers as Beethoven, Mozart and Vivaldi.

Music is everywhere! It's on all movies! Can you imagine any movie without music?! Of course, not. What if you watch television without sound, what if you see ballet without music, what if you hear voices without melody at the opera? Our life will be boring without music.

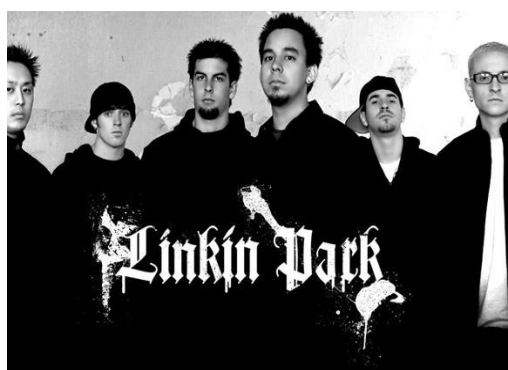

Moreover they make problems and everyday

music, which is used in kinds of music is classic such as Bach,

television, over radio, in

Dmytro Grabovssiy, gr. 412

MANY PEOPLE say that music is a waste of time. I do not think so. To my mind music is supposed to be interesting to everybody. Our life would be boring without music.

I always listen to my favourite music group, when I am happy or unhappy. I listen to the music everywhere: during training, at home or just taking a walk. And it, in turn, either calms me, or on the contrary makes me fall into melancholy. I like to walk around the city with my favourite songs, it helps me focus on something, and

choose the right solution in a situation that worries me.

As for me, my favourite group is «Linkin Park». They sing in different styles, such as: alternative, new metal, heavy metal and rock. I like this group because of good texts of their songs and unusual musical decisions. This group was formed in 1996. They released 9 albums. I like all their songs without exceptions. But still my favourite song is “In The End”. There are six men in this group. The most prominent person of the group is Chester Bennington. Nowadays he takes the 27th place in the hit parade list of “100 of all times top heavy metal vocalists”.

To sum up, I would like to add that music can influence on people. It can inspire and enrich them. It can remind of some places and times. Music is not only another art form but a powerful force, which helps us live.

Dmitro Momot, gr.611

MUSIC APPEARED in my life long before I learned to distinguish different styles and trends, learned about the work of great composers and musicians.

The first melody I heard was my mother's lullaby. Her melodious tunes reassured me and, for certain, laid the foundation for my good attitude to music. Then there were musical performances and plays, favorite children's songs and first idols. My taste changed simultaneously with my age, today I like rock, tomorrow it will be pop music, a week ago I was ready to listen to recordings of famous rappers, sometimes I listen to reggae, and I do my lessons listening popular songs on the radio channels.

But now I have my first idols and my favorite style in music. This is a very famous South Korean group "EXO". Today, the group consists of eight people. When I first was interested in and met with Korean performers, I was very surprised that it took them for about eight years to become world

famous. They are taught vocal, rap, choreography, how to behave and what to say at meetings and various shows. Out of a thousand trainees, only a few become known to the whole world and donate their creativity to millions. Their music will help us when it becomes sad, hard, or vice versa when we have a lot of fun and we are happy.

Music in my life is the necessary stimulus that helps achieve goals, a constant conductor and a skilled doctor of spiritual wounds. It is an important element in the life of everyone. I can't imagine life without music. It helps us live, not just exist!

Alina Rudkovskaia, gr.412

EVERYBODY KNOWS that music is a combination of many sounds. They may be short and long, weak and strong. Besides music reflects the emotions of people. We can say that music is an art emotional power.

We cannot live without it. We like to listen we love dancing to music, we can play musical instruments.

In the modern world it is hard to imagine a does not have a favourite genre of music, a song or a singer. Among many kinds of music I

Often, when you meet a person, one of the main issues is his or her preferences of the kind of music, and you can judge a person by the songs he listens to.

For me, music is of great importance in my life, thanks to my favorite performers, I can get away from the problems, remember good moments, get inspired and dream. In fact, I can call myself a music lover, as I listen to a lot. I would like to add that rap music, opposed to pop music, generally, relies more on lyrics than melody. We listen to it for its clever and poetic wordplay, cultural preferences and commentary on life. I

rap for the same reason. I enjoy stories character that I can relate to and builds my attention. I like to share my music discuss new clips or some music

One of the main topics for me attending concerts. For me, this is one that can only be. Those feelings when concert of your favorite group or singer Everyone sees life in different ways ways. Different music at different times of life accompanies a person. Therefore, it is an integral part of my life!

mood and of special to music,

person who favourite sing rap.

enjoy some types of the rapper becomes a a narrative that holds with friends, I love to stories.

concerning music is of the best moments you come to the are incredible. and lives in different

Roman Bilyi, 412 group

MUSIC PLAYS an important role in the life of everyone.

For example, if you are sad you can listen to your favorite song and you will feel easier at once. I know it from my own experience. I have begun listening to music since my study at university. This is due to the fact that I spend a lot of time in the transport going to my school and coming back home. During the travel I turn on my player and it helps me relax and the time runs quicker.

But I do not understand people listening to the same genre. to the same kind of music I believe chosen depending on the mood, so in be music for any case.

For example, you had a you'd better listen to a cheerful, fast And if you want to fall asleep faster, then I recommend you the classic.

We are very fortunate, because nowadays there is no problem with the availability of music. I mean, it's just enough to press a couple of buttons on your device and you listen to the song immediately. The worst situation was with our parents and grandparents. They had to deal with cassettes and vinyl records. In my opinion it was not convenient enough.

I do not imagine a modern person without at least a couple of songs in his smartphone. With the help of the Internet you can find any song and singer.

Moreover music is a multicolored palette, where everyone can choose something good.

Vladislav Reutskiy, gr.412

who are constantly Personally I do not listen that music must be your playlist there should

difficult day, in this case, song that cheers you. for example in a train,

I DON'T ACTUALLY like to travel. I prefer the comfort of home to the atmosphere of adventure and travel. I feel good in my native city and the city where I am studying and living at the moment. But, there is one journey that worries me deeply. I want to tell you about the journey that I would like to make in future.

I would like to travel to the land of the rising sun – Japan. I admire Japanese and Asian culture. It differs from the Ukrainian one in its atmosphere, historical significance and influence on the

cultures of other countries. They have a great national cuisine, beautiful outfits for their rituals, and it is also worth mentioning the tea ceremony and the kung fu school that many of us could see in Hollywood films or old films with famous actor Jackie Chan (he is Chinese).

I would like to visit a capital of Japan – Tokyo. It's a fantastic city, with amazing architecture, which combines the huge skyscrapers and ordinary residential buildings. I just adore the neon districts of Tokyo, whose photos I found in the Internet. These districts are similar to the novels of William Gibson "Neuromancer", where humanity lives in the era of cyberpunk and high-tech utopian future, where hackers (named deckers) fight against the corporations.

I adore cyberpunk setting in literature and videogames, so that is one of the main reasons why I want to visit Tokyo – to travel around neon districts and delve into their atmosphere.

One of the main districts of Tokyo is Akihabara. Akihabara is considered a cultural center and a shopping district for geeks (in Japan named like otaku) with video games, anime, manga, and different computer goods. As a technical specialist and a fan of the Asian media-culture, I am quite interested in walking along the night streets of Akihabara and visiting different shops of electronics or anime.
